Art Unit: 2832

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ranslers taken with either Zelt or Wilfinger. The basic package is shown by Renskers to that package or case 10 applicant has added a reinforcement rib or beam. The expedient of using a rib on beam in order to provide reinforcement to a case is notoriously old as shown by either Zelt or Wilfinger et al. It would have been obvious for Renskers to have a beam or rib in his casing 12, 16 in order to provide reinforcement as taught by either Wilfinger or Zelt.
